

1 Colour the non-living organisms.

2 Complete the chart with the correct words from the box.

nutrition fish plants oxygen

Living Organisms			
Examples:	<i>cat</i>	<i>tree</i>	<input type="text"/>
They are:	<i>animals</i>	<i>people</i>	<input type="text"/>
They need:	<i>food</i>	<i>water</i>	<input type="text"/>
Functions:	<i>reproduction</i>	<i>interaction</i>	<input type="text"/>

3 Colour the three vital functions that living organisms carry out.

nutrition

swimming

reproduction

speaking

interaction

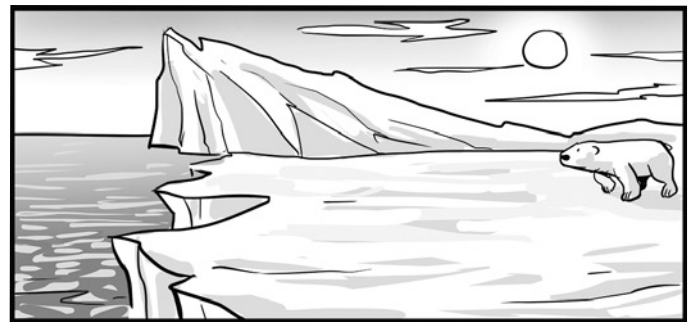

walking

4 Circle what is included in an ecosystem.

music land water money air living organisms TV programmes

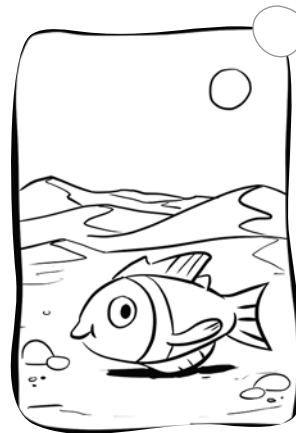

5 Write the name of the ecosystem for Box A. Draw two animals from the ecosystem in box B.

Pole

6 What is the adaptation problem? Match.

1 It doesn't live in the water.
There isn't enough sunlight.

2 It can't swim in the sand. It's too hot.
It's got gills, not lungs.

3 It can't run or climb trees. There aren't
any fish to eat. There isn't any seawater.
